930053112 Analyse

DOF GROUP ASA (930053112)

Model: openai/gpt-oss-20b | 10/22/2026, 10:33:06 AM

Documented facts (sources)

Organisation number: 930053112 [brreg | 10/22/2026, 10:32:54 AM]

Company name: DOF GROUP ASA [brreg | 10/22/2026, 10:32:54 AM]

Industry (NACE code): 09.109 Andre tjenester tilknyttet utvinning av råolje og naturgass [brreg | 10/22/2026, 10:32:54 AM]

Organisation form: Allmennaksjeselskap [brreg | 10/22/2026, 10:32:54 AM]

Registered place: STOREBØ [brreg | 10/22/2026, 10:32:54 AM]

Registered website: (none registered) [brreg | 10/22/2026, 10:32:54 AM]

AI assessment

AI-Driven Predictive Maintenance for Subsea Assets
Deploy machine learning models on real-time sensor data from subsea equipment (OSVs, subsea assets) to predict component wear and schedule maintenance before failures occur, reducing downtime and maintenance costs.
Expected value: Improved asset reliability, lower unplanned downtime, cost savings through optimized maintenance schedules.
Based on: brreg:nace, websearch:text

AI-Powered Route and Fuel Optimization for Marine Fleet
Utilize AI to analyze weather, traffic, and vessel performance data to compute optimal routes and speeds, enhancing fuel efficiency and reducing emissions for the company’s modern fleet.
Expected value: Lower fuel consumption, reduced CO2 emissions, cost savings, improved sustainability profile.
Based on: brreg:nace, websearch:text

AI-Enabled Sustainability Reporting Automation
Implement AI to automatically gather, validate, and compile sustainability metrics from operational data, enabling timely and accurate reporting aligned with the company's sustainability commitments. *Expected value: Faster reporting turnaround, higher data accuracy, stronger stakeholder confidence in sustainability claims.*

Based on: brreg:nace, websearch:text

Limitations

- Analysis is based solely on the provided registry facts (orgnr, name, nace, orgform, place, website) and the website excerpt; no internal operational data, financial figures, or existing AI initiatives were available. The suggestions are qualitative and do not include specific implementation details, cost estimates, or performance metrics.
