AI opportunity analyser

Enter a Norwegian organisation number (9 digits). The app retrieves facts from Brreg, reads the company website, and asks an LLM for grounded AI opportunities. Facts, sources and the AI's own assessment are shown separately.

Documented facts (sources)

Organisation number: 880309102 [brreg | 10/22/2026, 10:36:02 AM]

Company name: EVINY AS [brreg | 10/22/2026, 10:36:02 AM]

Industry (NACE code): 35.140 Distribusjon av elektrisitet [brreg | 10/22/2026, 10:36:02 AM]

Organisation form: Aksjeselskap [brreg | 10/22/2026, 10:36:02 AM]

Registered place: BERGEN [brreg | 10/22/2026, 10:36:02 AM]

Registered website: www.eviny.no [brreg | 10/22/2026, 10:36:02 AM]

Registered employees: 77 [brreg | 10/22/2026, 10:36:02 AM]

AI assessment

Predictive Maintenance for Hydro and Wind Assets
Implement AI models that analyze sensor data from hydro and wind turbines to predict component wear and schedule maintenance before failures occur, reducing downtime and extending asset life.
Expected value: Improved reliability of power generation, lower maintenance costs, and increased availability of renewable energy for distribution.
Based on: brreg:nace, brreg:website

AI-Driven Demand Forecasting and Dynamic Pricing
Use machine learning to forecast short-term electricity demand and adjust pricing signals in real time, helping balance supply and demand across the grid and encouraging efficient consumption.
Expected value: Enhanced grid stability, reduced peak load pressure, and better alignment of renewable supply with consumer demand.
Based on: brreg:nace, brreg:website

AI-Powered Workforce Scheduling and Skill Matching
Apply AI to match the 77 employees' skills with operational tasks and optimize shift schedules, ensuring that the right expertise is available when needed.
Expected value: Higher workforce productivity, reduced overtime costs, and improved employee satisfaction.

Based on: brreg:employees, brreg:orgform

Sources (incl. web search)

- **brreg** | Brreg entry 880309102 | ok
- **website** | eviny.no | ok

Limitations

- Analysis relies solely on registry facts (nace, employees, orgform, place) and the homepage excerpt; no operational, financial, or technical data were provided.
- No quantitative performance metrics or cost estimates can be given because such data are not part of the documented facts.
- The suggestions are generic and may require further validation against internal data and regulatory requirements.
